<ul style="list-style-type: none">• Research is adequately broad and in-depth• Uses and justifies up-to-date, relevant sources• Organises collected data in a structured way• Is critical towards the research and the outcome• Shows overall view and insight								

Criterion Feedback

Notes check 1: Research & experimentation - Project definition - Satisfactory

Research	Excellent	Very good	Good	Satisfactory	Sufficient	Narrowly sufficient	Insufficient	Incomplete
<p>There's a lot of research done on different aspects. the different types of research that you do makes that it's broad and inspring and gives you inspiration to dive deeper into your topic. Your research is now lacking a clear insight into the archetypical garments, but let's work on this next phase.</p> <hr/> <hr/> <p>Notes check 2: Interim - Project definition, final graduation plan & realisation plan - Good</p> <p>You managed to bring more depth into your research and on every level it becomes more clear where the project is heading. Good that you now also focus on the eventual garment where the materials are made for.</p> <p>From communicating, researching, developing and executing the material, every angle is being researched in an honest suitable manner for the project.</p> <hr/> <hr/> <p>Notes check 3: Red/Green - Project status & finalising plan - Good</p> <hr/> <hr/> <p>Notes exam: Project outcome</p> <hr/> <hr/>

Criterion Feedback

Notes check 1: Research & experimentation - Project definition - Satisfactory

From your research your choices are very clear and well framed, consider how you could use the growing process of the biomaterials within the designs of the silhouettes. Intergrate the whole lifespan of the garment from design usability - moment of wearing till the afterlife.

Notes check 2: Interim - Project definition, final graduation plan & realisation plan - Good

So far all the decisions made bring more depth to the project and helps to take next steps.

The project becomes all-round which makes it interesting from multiple directions. Nevertheless try to keep your focus clear, what is the main topic you want to communicate?

Notes check 3: Red/Green - Project status & finalising plan - Good

Notes exam: Project outcome

Actualisation	Excellent	Very good	Good	Satisfactory	Sufficient	Narrowly sufficient	Insufficient	Incomplete

Actualisation	Excellent	Very good	Good	Satisfactory	Sufficient	Narrowly sufficient	Insufficient	Incomplete
<ul style="list-style-type: none"> • Makes an inspiring transition from idea to relevant product • The product is realised to a professional standard in content and form. • The product shows coherence with the conceptual starting points. 			✓					

Criterion Feedback

Notes check 1: Research & experimentation - Project definition - Sufficient

You present a very consistent actualisation of your research-based project that opens new doors to the next steps in actualisation.

your story is convincing and honest, take into account that you might face some limitations in the development of the bio materials, how can you work around of with this.

Actualisation	Excellent	Very good	Good	Satisfactory	Sufficient	Narrowly sufficient	Insufficient	Incomplete
<p>Notes check 2: Interim - Project definition, final graduation plan & realisation plan - Good</p> <p>Again you presented a very clear framework for your collection. Now it is important to figure out the details. For instance, how your platform will look in order to bridge your analogue biomaterial world with the digital world, this open source (?) platform will offer you answers on how your final 'product' could be designed and how you communicate it to your target group. Think about categories also for your materials and how you visualize this. For your final designs it might be useful to further explore (in depth) beautiful details from the sportswear industry and start in an early phase to test how your materials respond to certain finishings and detailing in combination with certain colors. This will define your story in a sharp way.</p> <hr/> <hr/> <p>Notes check 3: Red/Green - Project status & finalising plan - Good</p> <p>Doe ter voorbereiding van volgend semester nog detaillering tests, treksterkte tests en print test.</p> <hr/> <hr/> <p>Notes exam: Project outcome</p> <hr/> <hr/>

<ul style="list-style-type: none"> • Has insight into own strengths and weaknesses • Displays visible development • Can indicate areas for improvement by reflecting on own work 			✓					

Criterion Feedback

Notes check 1: Research & experimentation - Project definition - Satisfactory

You present an ambitious project and show us an inspiring work ethic, try to continue to reflect on the practical side of your ambitions, when it comes to actualisation / scaling / finishing into garments during the upcoming phases.

<p>Notes check 1: Research & experimentation - Project definition - Satisfactory</p> <p>You seem to be very well organized. Keep being aware that even though you follow this traject parttime in combination with your internship, we recommend you to continue to make a clear planning concerning design-actualisation as you have a time-consuming material-approach where grow your own textiles.</p> <hr/> <hr/>
